PLACE FOR PHOTOGRAPH.

TAKE an ordinary *carte de visite*, and soak it in cold water for about three hours. The thin paper on which the photograph is printed will peel off from the card without being injured. Let the portrait paper dry, trim it to the necessary size, and paste it in this place, very lightly, by the corners, and one or two spots on the side. Let the book be under pressure till the paste dries. The *light* pasting and pressure are necessary to prevent warping.

This method is preferable to the use of the entire *carte de visite*, as a book suitable for holding the heavy cards without warping would be very cumbrous.
